

Special Issue

Women in Osteology

Message from the Guest Editor

Over the last year, women have led ground-breaking research into public health, vaccines, treatments, and innovative technology and been on the front lines of the COVID-19 response as scientists and healthcare workers. To date, countless women have made historical contributions to bone research, with many influential female researchers from this field. In order to embrace gender equality, recognize the career progression of women, and to celebrate the achievements of women in the field of bone research, our journal will launch a Special Issue on “Women in Osteology”. For this edition, contributions in which women are the corresponding authors of the manuscripts are strongly encouraged.

Guest Editor

Prof. Dr. Elaine Dennison

MRC Lifecourse Epidemiology Centre, University of Southampton,
Southampton SO15 3BX, UK

Deadline for manuscript submissions

closed (31 March 2022)
