Deadline for manuscript  
submissions:

**closed (30 September 2022)**

### Message from the Guest Editors

This Special Issue aims to provide the opportunity to publish original research or review articles addressing emerging infections of small ruminants. Within this Issue, we intend to analyze our understanding of the epidemiology of small ruminant infectious diseases (e.g., the etiological factors, geographical spread, animal reservoirs, transmission routes, the effect on animal products). Studies contributing to better understanding the origin of diseases, detailed mechanisms of the host immune response, new diagnostic tools, treatment methods, or prevention strategies are also welcome.

We sincerely invite you to participate in this topic or related research topics to learn more about relevant small ruminant infectious diseases.

an Open Access Journal by MDPI

## Message from the Editor-in-Chief

The worldwide impact of infectious disease is incalculable. The consequences for human health in terms of morbidity and mortality are obvious and vast but, when infections of animals and plants are also taken into account, it is hard to imagine any other disease that has such a significant impact on our lives—on healthcare systems, on agriculture and on world economics. *Pathogens* is proud to continue to serve the international community by publishing high quality studies that further our understanding of infection and have meaningful consequences for disease intervention.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PubAg, CaPlus / SciFinder, AGRIS, and other databases.

**Journal Rank:** JCR - Q2 (*Microbiology*) / CiteScore - Q2 (*General Immunology and Microbiology*)
