Heart and Skeletal Muscle Inflammation (HSMI) and Other Effects of *Piscine orthoreovirus* (PRV) Infections in Salmonids

Guest Editors:

Dr. Maria K. Dahle

Senior Researcher, Fish Health
Research Group, Norwegian
Veterinary Institute, ÅS, Norway

Prof. Dr. Espen Rimstad

Faculty of Veterinary Medicine,
Norwegian University of Life
Sciences

Message from the Guest Editors

This special issue aims to collect new research related to the consequences of PRV infection in both farmed and wild salmonids, and welcome manuscripts on detection and prevalence, molecular characterization, pathogenesis of disease, diagnostic methods, virus-host interaction, cell-based studies, vaccine development and other means of disease prevention or infection control.

Deadline for manuscript
submissions:

closed (31 May 2021)

Prof. Dr. Lawrence S. Young

Warwick Medical School,
University of Warwick, Coventry
CV4 7AL, UK

Message from the Editor-in-Chief

The worldwide impact of infectious disease is incalculable. The consequences for human health in terms of morbidity and mortality are obvious and vast but, when infections of animals and plants are also taken into account, it is hard to imagine any other disease that has such a significant impact on our lives—on healthcare systems, on agriculture and on world economics. *Pathogens* is proud to continue to serve the international community by publishing high quality studies that further our understanding of infection and have meaningful consequences for disease intervention.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PubAg, CaPlus / SciFinder, AGRIS, and other databases.

Journal Rank: JCR - Q2 (*Microbiology*) / CiteScore - Q2 (*General Immunology and Microbiology*)
