Message from the Guest Editor

This Special Issue will cover a wide range of topics focusing on MERS-CoV infection and immunity, and aims to help fill the gaps in our current understanding of this pandemic threat. All types of articles will be considered for publication, including short reports, primary research articles, and reviews.

Deadline for manuscript
submissions:

closed (30 June 2020)

Message from the Editor-in-Chief

The worldwide impact of infectious disease is incalculable. The consequences for human health in terms of morbidity and mortality are obvious and vast but, when infections of animals and plants are also taken into account, it is hard to imagine any other disease that has such a significant impact on our lives—on healthcare systems, on agriculture and on world economics. *Pathogens* is proud to continue to serve the international community by publishing high quality studies that further our understanding of infection and have meaningful consequences for disease intervention.

Author Benefits

Open Access:— free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, AGRICOLA, CaPlus / SciFinder, and many other databases.

Journal Rank: JCR - Q2 (*Microbiology*)
