Salmonella and Campylobacter Infection in Poultry

Guest Editor:

Dr. Andrea McWhorter

School of Animal and Veterinary Sciences, University of Adelaide, Adelaide, SA 5005, Australia

Deadline for manuscript submissions: closed (30 November 2021)

Message from the Guest Editor

The focus of this Special Issue will be on host-bacterial interaction in poultry birds with special interest on the mechanisms involved in *Salmonella* and *Campylobacter* persistence, as well as the host immune response to infection. The aim of this Special Issue is to highlight and expand our current understanding of host-pathogen interactions between *Campylobacter*, *Salmonella* in different commercial poultry birds.

Editor-in-Chief

Prof. Dr. Lawrence S. Young Warwick Medical School, University of Warwick, Coventry CV4 7AL, UK

Message from the Editor-in-Chief

The worldwide impact of infectious disease is incalculable. The consequences for human health in terms of morbidity and mortality are obvious and vast but, when infections of animals and plants are also taken into account, it is hard to imagine any other disease that has such a significant impact on our lives—on healthcare systems, on agriculture and on world economics. *Pathogens* is proud to continue to serve the international community by publishing high quality studies that further our understanding of infection and have meaningful consequences for disease intervention.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PubAg, CaPlus / SciFinder, AGRIS, and other databases.

Journal Rank: JCR - Q2 (*Microbiology*) / CiteScore - Q2 (*General Immunology and Microbiology*)
