Science Center, Bryan, TX, USA

Deadline for manuscript  
submissions:

**closed (30 November 2022)**

### Message from the Guest Editor

The year 2022 marks the 10th anniversary of the publication of *Pathogens*. We would like to express our sincerest thanks to our readers, innumerable authors, anonymous peer reviewers, editors, and all the people working in one way or another for the journal, who have made substantial contributions over the years. We are delighted and proud to celebrate this milestone with a series of Special Issues and events.

To mark this important milestone, a Special Issue entitled “10th Anniversary of Pathogens—T Cells in Pathogenic Infections” will be launched as a part of this celebration.

T cells play a central role in the immune response against pathogenic infections, and T cell-based therapy has shown significant potential as a more powerful approach for treating various pathogenic diseases by harnessing the body's immune system.

## Message from the Editor-in-Chief

The worldwide impact of infectious disease is incalculable. The consequences for human health in terms of morbidity and mortality are obvious and vast but, when infections of animals and plants are also taken into account, it is hard to imagine any other disease that has such a significant impact on our lives—on healthcare systems, on agriculture and on world economics. *Pathogens* is proud to continue to serve the international community by publishing high quality studies that further our understanding of infection and have meaningful consequences for disease intervention.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, CaPlus / SciFinder, AGRIS, and other databases.

**Journal Rank:** JCR - Q2 (Microbiology) / CiteScore - Q1 (Infectious Diseases)
