Deadline for manuscript
submissions:

closed (20 February 2022)

Message from the Guest Editor

Dear Colleagues,

We have launched a Special Issue titled “Feature Papers of Vaccines and Therapeutic Developments”. This Special Issue aims to solicit primary research articles, reviews, editorials, and commentaries on contemporary and hot topics from scholars.

Due to the pandemic, scholars have experienced significant delays in their research works. Despite the current situation, many researchers have devoted their time to conducting research and submitting their original papers on COVID-19 to *Pathogens* in the hope that these published papers might assist researchers in combating the virus. In the hope of acknowledging scholars' works and avoiding inconveniences brought by the pandemic, this Special Issue is specifically dedicated to Feature Papers of Vaccines and Therapeutic Developments. We sincerely hope that scholars from all over the world will publish papers based on their research over recent years.

Prof. Roberto Paganelli

Guest Editor

an Open Access Journal by MDPI

Message from the Editor-in-Chief

The worldwide impact of infectious disease is incalculable. The consequences for human health in terms of morbidity and mortality are obvious and vast but, when infections of animals and plants are also taken into account, it is hard to imagine any other disease that has such a significant impact on our lives—on healthcare systems, on agriculture and on world economics. *Pathogens* is proud to continue to serve the international community by publishing high quality studies that further our understanding of infection and have meaningful consequences for disease intervention.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, CaPlus / SciFinder, AGRIS, and other databases.

Journal Rank: JCR - Q2 (Microbiology) / CiteScore - Q1 (Infectious Diseases)
