

Special Issue

Opportunistic and Rare Parasitic Infections

Message from the Guest Editors

The European Multicolloquium of Parasitology (EMOP) 2024 is holding a session on opportunistic and rare parasitic infections. It is clear that awareness of these parasitic agents needs to be increased. Pathogens such as free-living *Amoebae*, *Pneumocystis*, *Blastocystis* and other parasitic agents are almost unknown agents which are yet to be fully understood. Considering that this session will help to further develop the knowledge of these pathogens, we kindly invite you to submit your scientific work and/or reviews to this Special Issue. It is important to explore advances in the diagnosis and treatment of the pathologies caused by these pathogens, as well as epidemiological data that demonstrate their importance worldwide. No less important is the description of the pathogenicity mechanisms that allow the search for more effective therapeutic targets.

About the Journal

Message from the Editor-in-Chief

The worldwide impact of infectious disease is incalculable. The consequences for human health in terms of morbidity and mortality are obvious and vast but, when infections of animals and plants are also taken into account, it is hard to imagine any other disease that has such a significant impact on our lives—on healthcare systems, on agriculture and on world economics.

Pathogens is proud to continue to serve the international community by publishing high quality studies that further our understanding of infection and have meaningful consequences for disease intervention.

Editor-in-Chief

Prof. Dr. Hinh Ly

Department of Veterinary & Biomedical Sciences, University of Minnesota, Twin Cities, MN, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, CaPlus / SciFinder, AGRIS, and other databases.

Journal Rank:

JCR - Q2 (Microbiology) / CiteScore - Q1 (Infectious Diseases)
