10th Anniversary of Pathogens —Emerging and Re-emerging Viral Pathogens in a Pandemic World

Message from the Guest Editor

The year 2022 marks the 10th anniversary of the journal Pathogens. We are delighted and proud to celebrate with a series of Special Issues and events. We would like to express our sincerest thanks to our innumerable readers, authors, anonymous peer reviewers, editors, and all others who have worked in some way for the journal and made substantial contributions over the years. Reaching this landmark would not have been possible without your support.

To mark this important milestone, we have launched a dedicated Special Issue entitled “10th Anniversary of Pathogens—Emerging and Re-emerging Viral Pathogens in a Pandemic World”, which is now open for submissions.

We have been living in the new era of a pandemic world, and we would like to embrace and represent the research into many of these viral diseases that can lead to the occurrence of pandemics. This Special Issue will consider any research article that has focused on emerging or re-emerging viral pathogens, from basic research on host-pathogen interactions and immune responses to viral pathogens to possible application, i.e., potential treatments or vaccines.

About the Journal

Message from the Editor-in-Chief

The worldwide impact of infectious disease is incalculable. The consequences for human health in terms of morbidity and mortality are obvious and vast but, when infections of animals and plants are also taken into account, it is hard to imagine any other disease that has such a significant impact on our lives—on healthcare systems, on agriculture and on world economics.

Pathogens is proud to continue to serve the international community by publishing high quality studies that further our understanding of infection and have meaningful consequences for disease intervention.

Editor-in-Chief

Prof. Dr. Hinh Ly

Department of Veterinary & Biomedical Sciences, University of Minnesota, Twin Cities, MN, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, CaPlus / SciFinder, AGRIS, and other databases.

Journal Rank:

JCR - Q2 (Microbiology) / CiteScore - Q1 (Infectious Diseases)
