

Special Issue

Ticks and Tick-Borne Pathogens in a Changing World

Message from the Guest Editors

This special issue welcomes researchers and reviewers with an interest in climate change and tick ecology, emerging and re-emerging tick-borne diseases and novel diagnostic approaches to tick-borne pathogens with a One Health approach to ticks and their pathogens across the globe. This special issue aims to foster interdisciplinary research and collaboration with a hope to gain a deeper understanding of the complex factors which may be driving the emergence and spread of tick-borne diseases.

About the Journal

Message from the Editor-in-Chief

The worldwide impact of infectious disease is incalculable. The consequences for human health in terms of morbidity and mortality are obvious and vast but, when infections of animals and plants are also taken into account, it is hard to imagine any other disease that has such a significant impact on our lives—on healthcare systems, on agriculture and on world economics.

Pathogens is proud to continue to serve the international community by publishing high quality studies that further our understanding of infection and have meaningful consequences for disease intervention.

Editor-in-Chief

Prof. Dr. Hinh Ly

Department of Veterinary & Biomedical Sciences, University of Minnesota, Twin Cities, MN, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, CaPlus / SciFinder, AGRIS, and other databases.

Journal Rank:

JCR - Q2 (Microbiology) / CiteScore - Q1 (Infectious Diseases)
