

Special Issue

Pathogens in 2023

Message from the Guest Editors

In 2023, the 12th volume of our journal is due to be published. This remarkable achievement would not have been possible without our readers, innumerable authors, anonymous peer reviewers, editors, and all others contributing in some way to the journal. To start another consecutive year of excellence on a high note, a Special Issue entitled “*Pathogens* in 2023” is being launched. This Special Issue collects high-quality original research and review articles in all areas of interest covered by *Pathogens*. The Special Issue aims to collect papers by our Editors-in-Chief, Editorial Board Members, authors, and reviewers in *Pathogens*. We kindly encourage all research groups to contribute up-to-date results from the latest developments in their respective laboratories.

Guest Editors

Dr. Anastasia Diakou

Dr. Serafeim Chaintoutis

Prof. Dr. Mathios Mylonakis

Dr. Maria Panopoulou

Dr. Georgia Gioula

Prof. Dr. Georgia Vrioni

Deadline for manuscript submissions

closed (31 December 2023)

About the Journal

Message from the Editor-in-Chief

The worldwide impact of infectious disease is incalculable. The consequences for human health in terms of morbidity and mortality are obvious and vast but, when infections of animals and plants are also taken into account, it is hard to imagine any other disease that has such a significant impact on our lives—on healthcare systems, on agriculture and on world economics.

Pathogens is proud to continue to serve the international community by publishing high quality studies that further our understanding of infection and have meaningful consequences for disease intervention.

Editor-in-Chief

Prof. Dr. Hinh Ly

Department of Veterinary & Biomedical Sciences, University of Minnesota, Twin Cities, MN, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, CaPlus / SciFinder, AGRIS, and other databases.

Journal Rank:

JCR - Q2 (Microbiology) / CiteScore - Q1 (Infectious Diseases)
