Virus Structure and Assembly

Message from the Guest Editors

Since 1990, the FASEB Virus Structure and Assembly Conference has been a premier event for presenting and learning about virus research. The conference covers a broad range of bacterial, archaeal, and eukaryotic viruses, bringing together structural biologists, virologists, and microbiologists, promoting interactions, and guiding young researchers to embrace studies on viruses. The broad focus on viruses encourages interdisciplinary approaches and stimulates collaborations, overcoming silos of more topic-focused conferences. The 2024 meeting will be held in Southbridge, MA, covering topics from virus structure to pandemic readiness. The SI will cover all major conference topics, including virus structure and assembly, archaea/giant viruses, computational virology, emerging viruses, anti-viral therapies, and viral evolution. We encourage attendees of the 2024 FASEB Virus Structure and Assembly to contribute to this SI by submitting original research articles or reviews pertinent to the topics of this conference.

About the Journal

Message from the Editor-in-Chief

The worldwide impact of infectious disease is incalculable. The consequences for human health in terms of morbidity and mortality are obvious and vast but, when infections of animals and plants are also taken into account, it is hard to imagine any other disease that has such a significant impact on our lives—on healthcare systems, on agriculture and on world economics.

Pathogens is proud to continue to serve the international community by publishing high quality studies that further our understanding of infection and have meaningful consequences for disease intervention.

Editor-in-Chief

Prof. Dr. Hinh Ly

Department of Veterinary & Biomedical Sciences, University of Minnesota, Twin Cities, MN, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, CaPlus / SciFinder, AGRIS, and other databases.

Journal Rank:

JCR - Q2 (Microbiology) / CiteScore - Q1 (Infectious Diseases)
