

## Special Issue

# HIV Reservoir Dynamics and Latency Mechanisms Under Current and Emerging Antiviral Strategies

### Message from the Guest Editors

Despite advances in ART, latent HIV reservoirs remain a **major barrier to viral eradication**. These reservoirs allow HIV to persist, evade immune surveillance, and rebound after treatment interruption. This Special Issue welcomes research that sheds light on:

- The biology of HIV reservoirs
- Mechanisms regulating latency
- Emerging strategies to reduce or eliminate reservoirs

### Guest Editors

Dr. Chen Zhang

College of Medicine, University of Nebraska Medical Center, 42nd and Emile, Omaha, NE, USA

Dr. Prasanta K. Dash

Department of Pharmacology and Experimental Neuroscience, College of Medicine, University of Nebraska Medical Center, Omaha, NE 68198, USA

### Deadline for manuscript submissions

31 August 2026

## About the Journal

### Message from the Editor-in-Chief

The worldwide impact of infectious disease is incalculable. The consequences for human health in terms of morbidity and mortality are obvious and vast but, when infections of animals and plants are also taken into account, it is hard to imagine any other disease that has such a significant impact on our lives—on healthcare systems, on agriculture and on world economics.

*Pathogens* is proud to continue to serve the international community by publishing high quality studies that further our understanding of infection and have meaningful consequences for disease intervention.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, CaPlus / SciFinder, AGRIS, and other databases.

#### Journal Rank:

JCR - Q2 (Microbiology) / CiteScore - Q1 (Infectious Diseases)
