Special Issue

Emerging and Neglected Pathogens in the Balkans

Message from the Guest Editors

In this Special Issue, we would like to focus on all aspects of emerging and neglected pathogens in the Balkan area. Topics of interest include (but are not limited to) epidemiology, vector competence and ecology, disease pathogenesis, pathogen–host interactions, virulence factors, clinical aspects, immune response, and diagnostic methods. This Special Issue will also highlight the role of a multidisciplinary approach ('One Health') in the surveillance and control of zoonotic diseases.

Guest Editors

About the Journal

Message from the Editor-in-Chief

The worldwide impact of infectious disease is incalculable. The consequences for human health in terms of morbidity and mortality are obvious and vast but, when infections of animals and plants are also taken into account, it is hard to imagine any other disease that has such a significant impact on our lives—on healthcare systems, on agriculture and on world economics. *Pathogens* is proud to continue to serve the international community by publishing high quality studies that further our understanding of infection and have meaningful consequences for disease intervention.

Editor-in-Chief

Prof. Dr. Hinh Ly

Department of Veterinary and Biomedical Sciences, College of Veterinary Medicine, University of Minnesota, Saint Paul, MN 55108, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, CaPlus / SciFinder, AGRIS. and other databases.

Journal Rank:

JCR - Q2 (Microbiology) / CiteScore - Q1 (Infectious Diseases)
