

Special Issue

Retroviruses: Molecular Biology, Immunology and Pathogenesis

Message from the Guest Editor

This Special Issue of *Pathogens* aims to bring together articles or reviews dealing with the most recent developments of all aspects of the research on human and animal retroviruses, from molecular and structural biology or recent -omics analysis, to virus–cell interactions, immunology and disease development, control or therapy in infected individuals. This will provide a comprehensive and up-to-date overview of the mechanisms underlying retroviral infections, replication, activation, host–virus interactions, and pathogenicity. We look forward to receiving your contributions.

Guest Editor

Dr. Christophe Guillon

About the Journal

Message from the Editor-in-Chief

The worldwide impact of infectious disease is incalculable. The consequences for human health in terms of morbidity and mortality are obvious and vast but, when infections of animals and plants are also taken into account, it is hard to imagine any other disease that has such a significant impact on our lives—on healthcare systems, on agriculture and on world economics.

Pathogens is proud to continue to serve the international community by publishing high quality studies that further our understanding of infection and have meaningful consequences for disease intervention.

Editor-in-Chief

Prof. Dr. Hinh Ly

Department of Veterinary & Biomedical Sciences, University of Minnesota, Twin Cities, MN, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, CaPlus / SciFinder, AGRIS, and other databases.

Journal Rank:

JCR - Q2 (Microbiology) / CiteScore - Q1 (Infectious Diseases)
