

Special Issue

African Swine Fever Virus Infection

Message from the Guest Editor

In this issue, we would like to focus on all aspects of ASF that provide an update of our current knowledge of the disease and may contribute to vaccine development. Topics of interest include (but are not limited to) transmission pathways, host–virus interactions, mechanisms of infection and viral spread, cell–virus interactions, disease dynamics, clinical aspects, pathology and standardization of pathological evaluation protocols, disease pathogenesis, factors responsible for virus virulence, virus persistence, vaccines, immune responses correlated with protection and how these can be activated, development and improvement of diagnostic techniques, new ASFV isolates discovery, epidemiology and antiviral drugs.

Guest Editor

Dr. Pedro J. Sánchez-Cordón

Animal and Plant Health Agency (APHA–Weybridge), Pathology Department (Building 57), Woodham Lane, New Haw, Addlestone, KT15 3NB, UK

About the Journal

Message from the Editor-in-Chief

The worldwide impact of infectious disease is incalculable. The consequences for human health in terms of morbidity and mortality are obvious and vast but, when infections of animals and plants are also taken into account, it is hard to imagine any other disease that has such a significant impact on our lives—on healthcare systems, on agriculture and on world economics.

Pathogens is proud to continue to serve the international community by publishing high quality studies that further our understanding of infection and have meaningful consequences for disease intervention.

Editor-in-Chief

Prof. Dr. Hinh Ly

Department of Veterinary & Biomedical Sciences, University of Minnesota, Twin Cities, MN, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, CaPlus / SciFinder, AGRIS, and other databases.

Journal Rank:

JCR - Q2 (Microbiology) / CiteScore - Q1 (Infectious Diseases)
