

# Special Issue

## Bovine Babesiosis

### Message from the Guest Editors

The goal of this current issue is to serve as a platform to present such studies and start filling knowledge gaps to better understand the disease and develop strategies to improve the control of bovine babesiosis. We will consider all types of articles for publication, including short reports, original research articles and reviews, and very much look forward to receiving contributions for this special issue of Pathogens.

## About the Journal

### Message from the Editor-in-Chief

The worldwide impact of infectious disease is incalculable. The consequences for human health in terms of morbidity and mortality are obvious and vast but, when infections of animals and plants are also taken into account, it is hard to imagine any other disease that has such a significant impact on our lives—on healthcare systems, on agriculture and on world economics.

*Pathogens* is proud to continue to serve the international community by publishing high quality studies that further our understanding of infection and have meaningful consequences for disease intervention.
