

Special Issue

Canine and Feline Infectious Diseases

Message from the Guest Editors

This Special Issue aims to cover the broad spectrum of research on canine and feline infectious diseases. We therefore invite the submission of research covering any aspect of pathogen infections in canine and feline medicine. We hope to bring together a body of work with the aim of improving the welfare of dogs and cats and to produce new data on spread, clinicopathological changes, and potential harm for human populations from canine and feline infectious diseases. For this specific research call, original or review papers on all aspects of canine and feline infectious diseases are welcome, as well as news and updates on etiology, epidemiology, clinicopathological signs and the pathophysiology, diagnosis, treatment, immunity, prevention, and public health implications of canine and feline infectious disease.

We look forward to your valuable contributions that will promote further developments in this field.

About the Journal

Message from the Editor-in-Chief

The worldwide impact of infectious disease is incalculable. The consequences for human health in terms of morbidity and mortality are obvious and vast but, when infections of animals and plants are also taken into account, it is hard to imagine any other disease that has such a significant impact on our lives—on healthcare systems, on agriculture and on world economics.

Pathogens is proud to continue to serve the international community by publishing high quality studies that further our understanding of infection and have meaningful consequences for disease intervention.

Editor-in-Chief

Prof. Dr. Hinh Ly

Department of Veterinary & Biomedical Sciences, University of Minnesota, Twin Cities, MN, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, CaPlus / SciFinder, AGRIS, and other databases.

Journal Rank:

JCR - Q2 (Microbiology) / CiteScore - Q1 (Infectious Diseases)
