

Special Issue

Current Research on *Fusarium*

Message from the Guest Editors

Special Issue "Current Research on *Fusarium*" aims to present some of the latest works on *Fusarium* genomics; population genetics, diversity and virulence mechanisms; pathogen-host interactions; the evaluation of the prevalence of *Fusarium* fungi; the pathogenicity and genome structure of *Fusarium* species; disease risk forecasting; the elucidation of risk-reduction strategies including cropping factors; sustainable disease control strategies; as well as the presentation of new laboratory techniques for the isolation, identification, detection and quantification of these pathogens, among other relevant topics.

Guest Editors

Dr. Daiva Burokienė

Dr. Skaidrė Supronienė

Prof. Dr. Peter N. Lipke

About the Journal

Message from the Editor-in-Chief

The worldwide impact of infectious disease is incalculable. The consequences for human health in terms of morbidity and mortality are obvious and vast but, when infections of animals and plants are also taken into account, it is hard to imagine any other disease that has such a significant impact on our lives—on healthcare systems, on agriculture and on world economics.

Pathogens is proud to continue to serve the international community by publishing high quality studies that further our understanding of infection and have meaningful consequences for disease intervention.

Editor-in-Chief

Prof. Dr. Hinh Ly

Department of Veterinary & Biomedical Sciences, University of Minnesota, Twin Cities, MN, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, CaPlus / SciFinder, AGRIS, and other databases.

Journal Rank:

JCR - Q2 (Microbiology) / CiteScore - Q1 (Infectious Diseases)
