Special Issue

Fish Pathogens: An Ongoing Challenge for Aquaculture

Message from the Guest Editors

This Special Issue aims to collect the latest research on fish pathogens, elucidating their impacts, significance, and current research focuses. This call for submissions extends to researchers engaged in marine and freshwater aquaculture, recognizing the global significance of fish pathogens across diverse aquatic environments. Contributions elucidating the molecular intricacies of the host–pathogen interplay, deciphering virulence determinants, and assessing the economic ramifications of fish diseases are particularly encouraged. We eagerly anticipate the submission of your latest findings, poised to enrich our collective understanding of fish pathogens and pave the way for innovative solutions to safeguard the future of aquaculture.

About the Journal

Message from the Editor-in-Chief

The worldwide impact of infectious disease is incalculable. The consequences for human health in terms of morbidity and mortality are obvious and vast but, when infections of animals and plants are also taken into account, it is hard to imagine any other disease that has such a significant impact on our lives—on healthcare systems, on agriculture and on world economics. *Pathogens* is proud to continue to serve the international community by publishing high quality studies that further our understanding of infection and have meaningful consequences for disease intervention.

Editor-in-Chief

Prof. Dr. Hinh Ly

Department of Veterinary and Biomedical Sciences, College of Veterinary Medicine, University of Minnesota, Saint Paul, MN 55108, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, CaPlus / SciFinder, AGRIS. and other databases.

Journal Rank:

JCR - Q2 (Microbiology) / CiteScore - Q1 (Infectious Diseases)
