Special Issue

Detection of Indoor Fungi: Part II

Message from the Guest Editor

For this Special Issue of the journal Pathogens, we invite you to submit innovative research papers and review articles as well as brief communications presenting recent advances related to our knowledge of fungi in enclosed spaces, including homes, office buildings, schools, healthcare and industrial settings and extreme indoor environments (HVAC, household devices), etc. Research papers and reviews can cover any aspect of detection methods and related issues of biodiversity, substrate preference, interaction with modern building materials, (chemo)taxonomic and phylogenetic studies, metabolism, pathogenicity, and strategies for mold remediation. We look forward to your contribution.

About the Journal

Message from the Editor-in-Chief

The worldwide impact of infectious disease is incalculable. The consequences for human health in terms of morbidity and mortality are obvious and vast but, when infections of animals and plants are also taken into account, it is hard to imagine any other disease that has such a significant impact on our lives—on healthcare systems, on agriculture and on world economics. *Pathogens* is proud to continue to serve the international community by publishing high quality studies that further our understanding of infection and have meaningful consequences for disease intervention.

Editor-in-Chief

Prof. Dr. Hinh Ly

Department of Veterinary & Biomedical Sciences, University of Minnesota, Twin Cities, MN, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, CaPlus / SciFinder, AGRIS. and other databases.

Journal Rank:

JCR - Q2 (Microbiology) / CiteScore - Q1 (Infectious Diseases)
