

## Special Issue

# Vector Control and Parasitic Infection in Animals

### Message from the Guest Editor

We invite researchers to share their latest discoveries in our Special Issue on parasite control and infectious agents that affect animal health, including those with repercussions for human health. Studies that explore the influence of environmental factors and climate change on the transmission and spread of these parasites are also welcome. The objective of this Special Issue is to contribute to the most recent advances in the diagnosis, epidemiology, and control of parasites that affect wild or domestic animals, with an emphasis on those of zoonotic importance. We seek to promote the exchange of knowledge among researchers from different areas of health, strengthening cooperation in tackling the complexity of diseases that affect both animals and humans.

### Guest Editor

Dr. Hermes Ribeiro Luz

Post-Graduation Program in Health and Environment, Biodiversity and Conservation, Northeast Biotechnology Network (RENORBIO) from the Center of Biological and Health Sciences, Federal University of Maranhão, São Luís, MA, Brazil

### Deadline for manuscript submissions

31 March 2026

## About the Journal

### Message from the Editor-in-Chief

The worldwide impact of infectious disease is incalculable. The consequences for human health in terms of morbidity and mortality are obvious and vast but, when infections of animals and plants are also taken into account, it is hard to imagine any other disease that has such a significant impact on our lives—on healthcare systems, on agriculture and on world economics.

*Pathogens* is proud to continue to serve the international community by publishing high quality studies that further our understanding of infection and have meaningful consequences for disease intervention.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, CaPlus / SciFinder, AGRIS, and other databases.

#### Journal Rank:

JCR - Q2 (Microbiology) / CiteScore - Q1 (Infectious Diseases)
