## **Special Issue**

# Advances in Host-Helminth Interactions

## Message from the Guest Editors

In this Special Issue of *Pathogens*, we will provide an updated representation of the current prevention, diagnosis, and pathogenesis of helminth infection. In addition, we offer further insight into future directions and emerging trends in translational science based on pathogen-derived molecules relevant to the topic. With these aims, we invite researchers to submit high-quality works for consideration. Original research articles, narrative reviews of particular interest and case reports will be considered. "Advances in Host-Helminth Interactions" will give specialists and scientists involved in parasitology the opportunity to share their experiences or point of view on several critical issues, with the primary objective of improving global knowledge.

## **About the Journal**

## Message from the Editor-in-Chief

The worldwide impact of infectious disease is incalculable. The consequences for human health in terms of morbidity and mortality are obvious and vast but, when infections of animals and plants are also taken into account, it is hard to imagine any other disease that has such a significant impact on our lives—on healthcare systems, on agriculture and on world economics. *Pathogens* is proud to continue to serve the international community by publishing high quality studies that further our understanding of infection and have meaningful consequences for disease intervention.

## **Editor-in-Chief**

Prof. Dr. Hinh Ly

Department of Veterinary and Biomedical Sciences, College of Veterinary Medicine, University of Minnesota, Saint Paul, MN 55108, USA

## **Author Benefits**

## **Open Access:**

free for readers, with article processing charges (APC) paid by authors or their institutions.

## **High Visibility:**

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, CaPlus / SciFinder, AGRIS. and other databases.

#### **Journal Rank:**

JCR - Q2 (Microbiology) / CiteScore - Q1 (Infectious Diseases)
