

Special Issue

Murine Models of Cytomegalovirus Infection

Message from the Guest Editors

For this *Pathogens* Special Issue, we invite submissions in the form of original research articles and reviews that give new insight into this well-defined model of an important but neglected human pathogen. All research focusing on relevant aspects of the infection are welcome, in particular preclinical models of CMV diseases and antiviral treatment, viral latency and reactivation, as well as investigations of virus-host interactions. We look forward to receiving your contributions.

About the Journal

Message from the Editor-in-Chief

The worldwide impact of infectious disease is incalculable. The consequences for human health in terms of morbidity and mortality are obvious and vast but, when infections of animals and plants are also taken into account, it is hard to imagine any other disease that has such a significant impact on our lives—on healthcare systems, on agriculture and on world economics.

Pathogens is proud to continue to serve the international community by publishing high quality studies that further our understanding of infection and have meaningful consequences for disease intervention.

Editor-in-Chief

Prof. Dr. Hinh Ly

Department of Veterinary & Biomedical Sciences, University of Minnesota, Twin Cities, MN, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, CaPlus / SciFinder, AGRIS, and other databases.

Journal Rank:

JCR - Q2 (Microbiology) / CiteScore - Q1 (Infectious Diseases)
