

Special Issue

Mycotoxigenic Fungi Associated with Food Commodities during Cultivation, Storage and Marketing

Message from the Guest Editors

This Special Issue aims to collect contributions relative to the most recent, original and innovative studies in this research field. In detail, investigations relative to the presence, the behavior and the epidemiology of mycotoxigenic fungi associated with different food commodities throughout the world during the cultivation, storage and marketing phases are welcome. In addition, contributions relative to the trend and evolution of mycotoxin accumulation in food matrices and to the prevention and management of mycotoxigenic fungi will be included.

Guest Editors

Dr. Giovanni Beccari

Dr. Mara Quaglia

Dr. Francesco Tini

Dr. Lorenzo Covarelli

About the Journal

Message from the Editor-in-Chief

The worldwide impact of infectious disease is incalculable. The consequences for human health in terms of morbidity and mortality are obvious and vast but, when infections of animals and plants are also taken into account, it is hard to imagine any other disease that has such a significant impact on our lives—on healthcare systems, on agriculture and on world economics.

Pathogens is proud to continue to serve the international community by publishing high quality studies that further our understanding of infection and have meaningful consequences for disease intervention.

Editor-in-Chief

Prof. Dr. Moriya Tsuji

School of Engineering Medicine, Texas A&M University, 2121 West
