

Special Issue

ParaFishControl: Advanced Tools and Research Strategies for Parasite Control in European Farmed Fish

Message from the Guest Editors

This Special Issue will focus on the results achieved during the 5-year project (2015–2020) ParaFishControl still to be published. Disease prevention and management are essential to the sustainability of the European aquaculture industry. Among other disease-related threats, parasites and related infections can cause significant damage to farmed fish species and can result in poor growth performance, impaired welfare, and high mortality rates with significant consequences in terms of production and economic performance. A great effort has already been made within the project period and this Special Issue aims to provide ParaFishControl participants with the opportunity to publish original research outcomes. We look forward to publishing your latest research with new findings on fish parasites.

About the Journal

Message from the Editor-in-Chief

The worldwide impact of infectious disease is incalculable. The consequences for human health in terms of morbidity and mortality are obvious and vast but, when infections of animals and plants are also taken into account, it is hard to imagine any other disease that has such a significant impact on our lives—on healthcare systems, on agriculture and on world economics.

Pathogens is proud to continue to serve the international community by publishing high quality studies that further our understanding of infection and have meaningful consequences for disease intervention.

Editor-in-Chief

Prof. Dr. Hinh Ly

Department of Veterinary & Biomedical Sciences, University of Minnesota, Twin Cities, MN, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, CaPlus / SciFinder, AGRIS, and other databases.

Journal Rank:

JCR - Q2 (Microbiology) / CiteScore - Q1 (Infectious Diseases)
