

## Special Issue

# Vector-Borne and Zoonotic Viral Infections

### Message from the Guest Editor

This Special Issue of *Pathogens* will focus on the latest research in the field of vector-borne and zoonotic viral infections, emphasizing the molecular biology, epidemiology, and public health implications of these diseases. We invite research articles and reviews that explore the factors influencing the spread and evolution of viral pathogens, host-vector interactions, surveillance strategies, and innovative approaches for disease prevention and control. Topics may include but are not limited to viral evolution, vector competence, diagnostics, vaccine development, and the role of environmental changes in altering vector-borne disease dynamics. We welcome you and your team to submit an article to this Special Issue, leveraging your expertise in vector-borne viral infections.

### Guest Editor

Dr. Nariman Shahhosseini

Centre for Vector-Borne Diseases, National Centre for Animal Diseases, Canadian Food Inspection Agency, Lethbridge, AB T1J 3Z4, Canada

### Deadline for manuscript submissions

15 December 2025

## About the Journal

### Message from the Editor-in-Chief

The worldwide impact of infectious disease is incalculable. The consequences for human health in terms of morbidity and mortality are obvious and vast but, when infections of animals and plants are also taken into account, it is hard to imagine any other disease that has such a significant impact on our lives—on healthcare systems, on agriculture and on world economics.

*Pathogens* is proud to continue to serve the international community by publishing high quality studies that further our understanding of infection and have meaningful consequences for disease intervention.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, CaPlus / SciFinder, AGRIS, and other databases.

#### Journal Rank:

JCR - Q2 (Microbiology) / CiteScore - Q1 (Infectious Diseases)
