

Special Issue

Infectious Diseases and Tropical Infections: Epidemiology, Transmission, Treatment, and Prevention

Message from the Guest Editors

Infectious diseases, particularly tropical infections, remain a significant public health concern, disproportionately affecting populations in resource-limited settings. Environmental, socioeconomic, and healthcare disparities exacerbate vulnerabilities, while the global health community continues to confront complex issues such as disease transmission, antimicrobial resistance, and the development of effective treatments and prevention strategies.

This *Pathogens* Special Issue aims to showcase cutting-edge research and insightful perspectives that address these pressing concerns. We invite high-quality submissions that highlight the latest advances and insights into infectious diseases, with a particular emphasis on those prevalent in tropical regions, which continue to pose critical global health challenges. We welcome original research articles, reviews, case studies, short communications, and perspectives.

About the Journal

Message from the Editor-in-Chief

The worldwide impact of infectious disease is incalculable. The consequences for human health in terms of morbidity and mortality are obvious and vast but, when infections of animals and plants are also taken into account, it is hard to imagine any other disease that has such a significant impact on our lives—on healthcare systems, on agriculture and on world economics.

Pathogens is proud to continue to serve the international community by publishing high quality studies that further our understanding of infection and have meaningful consequences for disease intervention.

Editor-in-Chief

Prof. Dr. Hinh Ly

Department of Veterinary & Biomedical Sciences, University of Minnesota, Twin Cities, MN, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, CaPlus / SciFinder, AGRIS, and other databases.

Journal Rank:

JCR - Q2 (Microbiology) / CiteScore - Q1 (Infectious Diseases)
