Special Issue

Elimination Strategies for Viral Hepatitis in Latin America

Message from the Guest Editor

This Special Issue is aimed at providing selected contributions on the progress of elimination strategies based on the regional characteristics of the host population and the HBV genotypes that circulate in the countries of Latin America. Potential topics include, but are not limited to, the following:

- Current state of the strategies for elimination of viral hepatitis in countries of Latin America.
- New epidemiological studies of viral hepatitis, either local, regional, or national.
- Qualitative or quantitative analysis related to establishing elimination strategies involving health authorities, civilians, and medical communities.
- The needs and recommendations for future basic and clinical research in hepatitis viruses in Latin America.
- Studies examining the clinical aspects of managing HBV infection and its natural history based on the host and virus genetics among Latin American populations.
- The role of medical societies and the medical community in eliminating viral hepatitis.
- Strategies or experiences in training or awareness campaigns of viral hepatitis among doctors, specialists, and society.
- Access to treatment and coverage of vaccination schemes.

About the Journal

Message from the Editor-in-Chief

The worldwide impact of infectious disease is incalculable. The consequences for human health in terms of morbidity and mortality are obvious and vast but, when infections of animals and plants are also taken into account, it is hard to imagine any other disease that has such a significant impact on our lives—on healthcare systems, on agriculture and on world economics. *Pathogens* is proud to continue to serve the international community by publishing high quality studies that further our understanding of infection and have meaningful consequences for disease intervention.

Editor-in-Chief

Prof. Dr. Hinh Ly

Department of Veterinary and Biomedical Sciences, College of Veterinary Medicine, University of Minnesota, Saint Paul, MN 55108, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, CaPlus / SciFinder, AGRIS. and other databases.

Journal Rank:

JCR - Q2 (Microbiology) / CiteScore - Q1 (Infectious Diseases)
