

Special Issue

Blood Parasites in Asia: Trends, Problems and Solutions

Message from the Guest Editors

We would like to invite you to contribute to this Special Issue entitled: “Blood Parasites in Asia: Trends, Problems and Solutions”. a. focus: The focus of this Special Issue is to show where we are in terms of field, clinical and laboratory diagnostics; epidemiology; emerging trends; and societal impacts (medical or veterinarian-like) in Asia regarding blood parasites. b. scope: Both original and review articles are welcomed. Potential topics include, but are not limited to, the following:

- surveillance, epidemiology, one health;
- diagnostics, prevention, treatment;
- vector-borne parasites;
- pathologies, physiology and immune disorders related to blood parasites;
- public health approaches and international cooperation.

c. purpose of the Special Issue: The aim of this Special Issue is to encourage those who work on blood parasites in Asia to share their findings and experience. d. suggest how this Special issue supplement existing literature: This Special Issue could discuss recent, recurrent, emerging problems, and studies which have been carried out in Asia to evaluate, assess, prevent and treat blood parasites in humans and animals.

About the Journal

Message from the Editor-in-Chief

The worldwide impact of infectious disease is incalculable. The consequences for human health in terms of morbidity and mortality are obvious and vast but, when infections of animals and plants are also taken into account, it is hard to imagine any other disease that has such a significant impact on our lives—on healthcare systems, on agriculture and on world economics.

Pathogens is proud to continue to serve the international community by publishing high quality studies that further our understanding of infection and have meaningful consequences for disease intervention.

Editor-in-Chief

Prof. Dr. Hinh Ly

Department of Veterinary & Biomedical Sciences, University of Minnesota, Twin Cities, MN, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, CaPlus / SciFinder, AGRIS, and other databases.

Journal Rank:

JCR - Q2 (Microbiology) / CiteScore - Q1 (Infectious Diseases)
