

## Special Issue

# Advanced Research on Viral Pathogens, Cancer and Host Immunity

### Message from the Guest Editors

Dear colleagues, We have launched a Special Issue titled “Advanced Research on Viral Pathogens, Cancer and Host Immunity”. This Special Issue aims to solicit primary research articles, reviews, editorials, and commentaries on contemporary and hot topics from all related researchers, for consideration for publication. Due to the pandemic, scholars have experienced significant delays in their research works. Despite the current situation, many researchers have devoted their time to conducting research and submitting their original papers on COVID-19 to *Pathogens* in the hope that these published papers might assist researchers in combating the virus. In the hope of acknowledging scholars’ works and avoiding inconveniences brought by the pandemic, we open this special issue for your submission. We sincerely hope that all experts in this research field will publish papers based on their research over recent years. We also welcome submissions from all scholars in the field.

### Guest Editors

Dr. Joe Yeong

Dr. Anthony Kian-Fong Liou

Dr. Jamie Mong Chen Yee

### Deadline for manuscript submissions

closed (20 May 2022)

## About the Journal

### Message from the Editor-in-Chief

The worldwide impact of infectious disease is incalculable. The consequences for human health in terms of morbidity and mortality are obvious and vast but, when infections of animals and plants are also taken into account, it is hard to imagine any other disease that has such a significant impact on our lives—on healthcare systems, on agriculture and on world economics.

*Pathogens* is proud to continue to serve the international community by publishing high quality studies that further our understanding of infection and have meaningful consequences for disease intervention.
