

Special Issue

Filamentous Fungal Pathogens

Message from the Guest Editor

This Special Issue is on filamentous fungi and their role as pathogens. Fungi are extremely important components of disease and will be detailed in this SI. The Issue will include fungi causing disease to plants, insects, and humans. The first paper in the Issue will be a review paper dealing with the importance of using molecular data to identify pathogens, as well as whether Koch's postulates are important. All other papers will match the first paper, with each paper dealing with specific topics or species so that they are well-cited. For example, paper 2 will deal with the infection of insects by fungi, paper 3 will deal with several new records of fungi from peritoneal dialysis patients, and paper 4 will deal with *Colletotrichum* species. The theme of using molecular data as being important to identify species will be prevalent in each paper.

About the Journal

Message from the Editor-in-Chief

The worldwide impact of infectious disease is incalculable. The consequences for human health in terms of morbidity and mortality are obvious and vast but, when infections of animals and plants are also taken into account, it is hard to imagine any other disease that has such a significant impact on our lives—on healthcare systems, on agriculture and on world economics.

Pathogens is proud to continue to serve the international community by publishing high quality studies that further our understanding of infection and have meaningful consequences for disease intervention.

Editor-in-Chief

Prof. Dr. Hinh Ly

Department of Veterinary & Biomedical Sciences, University of Minnesota, Twin Cities, MN, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, CaPlus / SciFinder, AGRIS, and other databases.

Journal Rank:

JCR - Q2 (Microbiology) / CiteScore - Q1 (Infectious Diseases)
