

Special Issue

Advances in Fish Virology: Emerging Viruses and Novel Techniques

Message from the Guest Editors

For this Special Issue, we invite papers that expand and diversify our understanding of virus–vertebrate interactions through studies involving fish—either in an aquaculture, biomedical or natural fishery context—as a means to increase resilience, competence, and efficiency with regard to current farming, biomedical, and environmental stewardship practices necessary for maintaining a healthy global ecosystem and society. We encourage papers describing new virus discoveries, emerging viral diseases, antiviral therapies, molecular detection methods, and viral–host interactions involving fish, particularly those utilizing novel technologies or techniques with the potential for accelerating further study.

Guest Editors

Dr. Mark Polinski

National Cold Water Marine Aquaculture Center, U.S. Department of Agriculture—Agricultural Research Service, Franklin, ME 04634, USA

Dr. Nicholas Phelps

Department of Fisheries, Wildlife and Conservation Biology, and the Minnesota Aquatic Invasive Species Research Center, University of Minnesota

About the Journal

Message from the Editor-in-Chief

The worldwide impact of infectious disease is incalculable. The consequences for human health in terms of morbidity and mortality are obvious and vast but, when infections of animals and plants are also taken into account, it is hard to imagine any other disease that has such a significant impact on our lives—on healthcare systems, on agriculture and on world economics.

Pathogens is proud to continue to serve the international community by publishing high quality studies that further our understanding of infection and have meaningful consequences for disease intervention.

Editor-in-Chief

Prof. Dr. Hinh Ly

Department of Veterinary & Biomedical Sciences, University of Minnesota, Twin Cities, MN, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, CaPlus / SciFinder, AGRIS, and other databases.

Journal Rank:

JCR - Q2 (Microbiology) / CiteScore - Q1 (Infectious Diseases)
