

Special Issue

Paralysis Worm - *Gurltia paralyans*

Message from the Guest Editors

In view of the lack of data in the literature for this feline neurological parasitosis, we are calling for submissions of original research manuscripts, comprehensive review articles, short communications and/or case studies dealing not only with epidemiology, biology and diagnosis but also with recent clinical, laboratory and pathological findings in cats infected with *G. paralyans*. On behalf of '*Pathogens*' (MDPI), we cordially invite you to submit your research work that falls within the scope of feline gurltiosis for publication in this upcoming Special Issue.

Guest Editors

Prof. Dr. Carlos Rodrigo Hermosilla

Institute of Parasitology, Faculty of Veterinary Medicine, Justus Liebig University Giessen, Giessen, Germany

Dr. Marcelo Gómez

Instituto de Farmacología y Morfología, Facultad de Ciencias Veterinarias, Universidad Austral de Chile, Valdivia, Chile

Deadline for manuscript submissions

closed (31 October 2021)

About the Journal

Message from the Editor-in-Chief

The worldwide impact of infectious disease is incalculable. The consequences for human health in terms of morbidity and mortality are obvious and vast but, when infections of animals and plants are also taken into account, it is hard to imagine any other disease that has such a significant impact on our lives—on healthcare systems, on agriculture and on world economics.

Pathogens is proud to continue to serve the international community by publishing high quality studies that further our understanding of infection and have meaningful consequences for disease intervention.

Editor-in-Chief

Prof. Dr. Hinh Ly

Department of Veterinary and Biomedical Sciences, College of
Veterinary Medicine, University of Minnesota, Saint Paul, MN 55108,
