

Special Issue

***Mycoplasma bovis* Infections: Occurrence, Pathogenesis, Diagnosis and Control, Including Prevention and Therapy**

Message from the Guest Editors

Mycoplasma bovis is known as an etiological agent for many disorders in cattle, among which the most important are bronchopneumonia, mastitis, and arthritis. *M. bovis* infections are a serious economic and cattle health and welfare problem worldwide. *M. bovis* affects different age groups of cattle, and it can persist in a herd for very long period of time. Moreover, in vitro studies on *M. bovis* field isolates show increasing trends in antimicrobial resistance. Currently, no commercial vaccines against *M. bovis* are available in Europe, and only some autogenous vaccines are used in parts of Europe and the United States. The Special Issue will cover all aspects of *M. bovis* infections, such as pathogenesis, diagnosis and control, including therapy and prevention. The Special Issue will consist of reviews, as well as original manuscripts.

About the Journal

Message from the Editor-in-Chief

The worldwide impact of infectious disease is incalculable. The consequences for human health in terms of morbidity and mortality are obvious and vast but, when infections of animals and plants are also taken into account, it is hard to imagine any other disease that has such a significant impact on our lives—on healthcare systems, on agriculture and on world economics.

Pathogens is proud to continue to serve the international community by publishing high quality studies that further our understanding of infection and have meaningful consequences for disease intervention.

Editor-in-Chief

Prof. Dr. Hinh Ly

Department of Veterinary & Biomedical Sciences, University of Minnesota, Twin Cities, MN, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, CaPlus / SciFinder, AGRIS, and other databases.

Journal Rank:

JCR - Q2 (Microbiology) / CiteScore - Q1 (Infectious Diseases)
