

Special Issue

Opportunistic Oral Pathogens in Oral and Systemic Diseases

Message from the Guest Editors

This Special Issue aims to update the knowledge on oral pathogens, particularly regarding their mechanisms for oral colonization, their pathogenicity, virulence and antimicrobial susceptibility, factors that impact their colonization in extra-oral sites, the interactions of oral pathogens with other microorganisms in oral and systemic biofilms, and their involvement in the underlying pathophysiologic mechanisms of oral and systemic diseases. Finally, this Special Issue also seeks to share recent strategies to detect colonization by oral pathogens and to contribute to the early diagnosis of infections, since it will be a key factor to control and prevent disease progression.

Guest Editors

Dr. Benedita Sampaio-Maia

Dr. Maria João Azevedo

Prof. Dr. Joana Campos

About the Journal

Message from the Editor-in-Chief

The worldwide impact of infectious disease is incalculable. The consequences for human health in terms of morbidity and mortality are obvious and vast but, when infections of animals and plants are also taken into account, it is hard to imagine any other disease that has such a significant impact on our lives—on healthcare systems, on agriculture and on world economics.

Pathogens is proud to continue to serve the international community by publishing high quality studies that further our understanding of infection and have meaningful consequences for disease intervention.

Editor-in-Chief

Prof. Dr. Hinh Ly

Department of Veterinary & Biomedical Sciences, University of Minnesota, Twin Cities, MN, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, CaPlus / SciFinder, AGRIS, and other databases.

Journal Rank:

JCR - Q2 (Microbiology) / CiteScore - Q1 (Infectious Diseases)
