

Special Issue

Oral Bacteria: Friends and Foes?

Message from the Guest Editors

This Special Issue aims to discuss the roles of both beneficial and pathogenic bacteria in oral infections and explore novel ecological approaches to control oral biofilms. It welcomes original papers and reviews that investigate and discuss at least one of the following: (1) Molecular insights on the roles of oral beneficial and pathogenic bacteria in oral infections; (2) interaction between oral bacteria (beneficial/pathogenic) and host; (3) interaction between oral beneficial bacteria and pathogenic bacteria; (4) application of microbiome modulation to maintain oral health; and (5) novel strategies to control oral polymicrobial biofilms.

Guest Editors

Dr. Dongmei Deng

Dr. Lei Cheng

Dr. Alessandra Nara de Souza Rastelli

About the Journal

Message from the Editor-in-Chief

The worldwide impact of infectious disease is incalculable. The consequences for human health in terms of morbidity and mortality are obvious and vast but, when infections of animals and plants are also taken into account, it is hard to imagine any other disease that has such a significant impact on our lives—on healthcare systems, on agriculture and on world economics.

Pathogens is proud to continue to serve the international community by publishing high quality studies that further our understanding of infection and have meaningful consequences for disease intervention.

Editor-in-Chief

Prof. Dr. Hinh Ly

Department of Veterinary & Biomedical Sciences, University of Minnesota, Twin Cities, MN, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, CaPlus / SciFinder, AGRIS, and other databases.

Journal Rank:

JCR - Q2 (Microbiology) / CiteScore - Q1 (Infectious Diseases)
