

## Special Issue

# Pathogens in Aquatic Environments

### Message from the Guest Editors

This Special Issue aims to provide the most current observations in the field of aquatic environment pathogens with respect to waterborne epidemiology, detection methods, interactions, environmental occurrence and persistence, and prevention or sanitization methods for unique aquatic environments. Potential topics include but are not limited to:

- Pathogens in water and sanitation systems;
- Novel methods for enumerating pathogens;
- A new and critical dimension to view aquatic antibiotic resistance pathogens;
- Relevant technologies for sanitation management.

---

### Guest Editors

Dr. Bing-Mu Hsu

Dr. Jung-Sheng Chen

Dr. Jagat Rathod

## About the Journal

### Message from the Editor-in-Chief

The worldwide impact of infectious disease is incalculable. The consequences for human health in terms of morbidity and mortality are obvious and vast but, when infections of animals and plants are also taken into account, it is hard to imagine any other disease that has such a significant impact on our lives—on healthcare systems, on agriculture and on world economics.

*Pathogens* is proud to continue to serve the international community by publishing high quality studies that further our understanding of infection and have meaningful consequences for disease intervention.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, CaPlus / SciFinder, AGRIS, and other databases.

#### Journal Rank:

JCR - Q2 (Microbiology) / CiteScore - Q1 (Infectious Diseases)
