Special Issue

Ticks & Piroplasms: Updates and Emerging Challenges

Message from the Guest Editors

This Special Issue aims to gather updates on current knowledge and beyond, under the thematic of ticks and piroplasms. We encourage the submission of not only research articles or short communications, presenting new data and using different methodologies, but also reviews of the most interesting achievements under this topic. Opinion articles on tick and piroplamids, control measures or programs are also welcome. We are sure that this issue will contribute to a better understanding of the complex tick-piroplasm-host relationship and bring forward innovative solutions to alleviate the negative effects imposed by such association.

About the Journal

Message from the Editor-in-Chief

The worldwide impact of infectious disease is incalculable. The consequences for human health in terms of morbidity and mortality are obvious and vast but, when infections of animals and plants are also taken into account, it is hard to imagine any other disease that has such a significant impact on our lives—on healthcare systems, on agriculture and on world economics. *Pathogens* is proud to continue to serve the international community by publishing high quality studies that further our understanding of infection and have meaningful consequences for disease intervention.

Editor-in-Chief

Prof. Dr. Hinh Ly

Department of Veterinary & Biomedical Sciences, University of Minnesota, Twin Cities, MN, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, CaPlus / SciFinder, AGRIS. and other databases.

Journal Rank:

JCR - Q2 (Microbiology) / CiteScore - Q1 (Infectious Diseases)
