

Special Issue

Pathogenesis of Viral Diseases

Message from the Guest Editor

In this Special Issue, we aim to assemble a collection of original research, review articles, and case reports that highlight the recent advances in understanding the pathogenesis of various human and zoonotic viruses of your expertise. We cordially invite you to submit manuscripts related to these topics:

- human virus
- zoonotic virus
- pathogenesis
- virus–host interaction
- disease
- host and tissue tropism
- immunopathogenesis
- immune responses

About the Journal

Message from the Editor-in-Chief

The worldwide impact of infectious disease is incalculable. The consequences for human health in terms of morbidity and mortality are obvious and vast but, when infections of animals and plants are also taken into account, it is hard to imagine any other disease that has such a significant impact on our lives—on healthcare systems, on agriculture and on world economics.

Pathogens is proud to continue to serve the international community by publishing high quality studies that further our understanding of infection and have meaningful consequences for disease intervention.

Editor-in-Chief

Prof. Dr. Hinh Ly

Department of Veterinary & Biomedical Sciences, University of Minnesota, Twin Cities, MN, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, CaPlus / SciFinder, AGRIS, and other databases.

Journal Rank:

JCR - Q2 (Microbiology) / CiteScore - Q1 (Infectious Diseases)
