

Topical Collection

Feature Papers in Pathophysiology

Message from the Collection Editor

This Topical Collection, "Feature Papers in Pathophysiology", intends to collect high-quality research articles, short communications, and reviews in all scientific fields related to pathophysiology, with a focus on clinical and pre-clinical research. Since the aim of this Topical Collection is to curate, through the selection of outstanding works, premier research in diagnostics, mechanisms, theoretical models and biomarkers. We encourage Editorial Board Members of *Pathophysiology* and members of the International Society for Pathophysiology and the Japanese Society for Pathophysiology to contribute manuscripts which cover the leading progress in their field of research, or to reach out to authorities and contemporaries who may wish to contribute. We are looking forward to your contributions to this Special Issue.
