

## Special Issue

# Vasodilators: New Insights

### Message from the Guest Editor

Vasodilators have been known for 120 years and yet our knowledge of them is still insufficient for successfully treating cardiovascular diseases, hypertension, angina pectoris, metabolic syndrome and other diseases requiring improved vasodilation. We invite you to publish your latest results on the molecular nature, mechanisms, modifiability, effects and therapeutic possibilities of endogenous vasodilators, as well as the drugs that belong to them. Our Special Issue is mainly devoted to original knowledge in the field of c-AMP-, c-GMP- and hyperpolarization-mediated vasodilation, and PDE5 inhibitors and potassium channel openers, to central vasomotor control mechanisms, cold-induced vasodilation and other mechanisms of vasodilation. We further focus on modifiers of vasodilatory mechanisms, such as polyphenolic substances and many antioxidants; the targeted delivery of vasodilators, e.g., through nanoparticles; potential new vasodilators; and new perspectives on treatment options. Original articles, experimental results, clinical studies and more-extensive reviews will be published. We look forward to your contributions and cooperation.

### Guest Editor

Dr. Olga Pecháňová

Institute of Normal and Pathological Physiology, Centre of Experimental Medicine, Slovak Academy of Sciences, Bratislava, Slovakia

### Deadline for manuscript submissions

closed (31 December 2022)

## About the Journal

### Message from the Editor-in-Chief

---

#### Editor-in-Chief

Prof. Dr. Jonathan Steven Alexander  
Department of Molecular and Cellular Physiology, LSU Health  
Shreveport, Shreveport, LA 71103, USA

---

#### Author Benefits

##### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

##### High Visibility:

indexed within ESCI (Web of Science), Scopus, PMC, PubMed, and other databases.

##### Journal Rank:

JCR - Q2 (Pathology) / CiteScore - Q2 (Pathology and Forensic Medicine)
