

## Special Issue

# Mental Health and Psychiatric Disorders of Children and Adolescents

### Message from the Guest Editor

This is a Special Issue on Mental Health and Psychiatric Disorders in Children and Adolescents; within, we aim to cover a variety of topics on preserving well-being, resilience and balance for the young in regard to environmental changes, behavioral expressions and health quality. Highlighting mental health challenges for children and adolescents comes as a priority in the post COVID-19 era; therefore, we encourage researchers to contribute to the international scientific dialogue. Numbers all over the globe show an increasing burden of mental health and psychiatric conditions concerning children, adolescent and their families. This also raises concerns about public health indicators, mental health in schools and general quality of life. This Special Issue will demonstrate a variety of topics on this specific scientific area, exploring the research results and best practices that may be used for future strategies in the control of any negative outcomes. In this Special Issue, original research articles and reviews are welcome. We look forward to receiving your contributions.

### Guest Editor

Dr. Artemis K. Tsitsika

Adolescent Health Unit, 2nd Department of Pediatrics, School of Medicine, National and Kapodistrian University of Athens, "P. & A. Kyriakou" Children's Hospital, 11527 Athens, Greece

### Deadline for manuscript submissions

31 October 2025

## About the Journal

### Message from the Editor-in-Chief

*Pediatric Reports (PR)* journal is a publishing platform for all topics concerning pediatrics, from basic research to bedside care. We aim at targeting a composite audience, from experienced pediatricians to young residents and fellows. Clinical observation of unusual cases will find their tribune, as well as trial reports and results of research related to diseases that may represent frequent or rare events faced by Pediatricians. We look forward to continuing the work done in the past years by *Pediatric Reports*, but also make the journal grow according to changing expectations and attitudes of both, clinicians and researchers who work for more effective pediatric care.
