Message from the Guest Editors

Dear Colleagues,

You are invited to submit manuscripts in this special issue “Preparation Technologies and Dissolution Behavior of Oral Solids”. Oral solids are ubiquitous as dosage forms to treat all the ills and chills by patients. Despite the many preparation methods in use for oral solids, there is still the search for innovative preparation technologies to overcome the limitations of the commonly used methods such as high shear wet granulation. Improvements in preparation methods such as the use of continuous manufacturing methods have improved productivity in the drug development process. In another spectrum, the release properties of fast dissolving drugs could be extended over a wider time span or be released at the desired site in the gastrointestinal tract through the use of specialized preparation technologies that confer the requisite properties to the oral solid dosage form. Additionally, properties of the drug itself like particle size and crystal form have their influence on the dissolution behaviors of oral solids. We look forward to manuscripts related to preparation technologies, dissolution and sustained release oral solids.

Message from the Editor-in-Chief

Because of your expertise in the field of drug sciences, I kindly invite you to consider publishing your current work, in the form of a research article or a review, in the open access electronic journal *Pharmaceuticals*.

Pharmaceuticals is characterized by an active editorial board and a dynamic editorial staff. Manuscripts are peer-reviewed and a final decision is provided to authors within 4–6 weeks after submission. Papers are published on the web immediately after acceptance. For details on the submission process or any other matter, please do not hesitate to contact us.

We hope to handle your contribution to *Pharmaceuticals* soon.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [PMC](#), [Embase](#), [CAPus / SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (Pharmaceutical Science)
