Message from the Guest Editors

Dear Colleagues,

The journal *Pharmaceuticals* now invites you to contribute review or original research articles covering the different facets of anticancer drug research, which will be published as a Special Issue on “Anticancer Drugs”. The focus of this Special Issue is on the design, synthesis and molecular mechanism of action of novel antitumor drugs and on the relationship between the chemical structure and the biochemical reactivity of the molecules. This issue will also provide an understanding of the biologic and genotypic context in which targets are selected for oncology drug discovery thus allowing rationalization of the activity of these drugs and guiding the design of more effective agents.
