Purinergic Receptors and Ectonucleotidases as Novel Therapeutic Targets

Guest Editors:

Dr. Claudio Coddou

 Departamento de Ciencias Biomédicas, Facultad de Medicina, Universidad Católica del Norte, Coquimbo, Chile
Millennium Nucleus for the Study of Pain (MiNuSPain), Santiago, Chile

Dr. Francisco Gabriel Vázquez Cuevas

Departamento de Neurobiología Celular y Molecular, Instituto de Neurobiología, Universidad Nacional Autónoma de México, Querétaro 76230, México

Deadline for manuscript submissions: closed (22 May 2024)

Message from the Guest Editors

Fifty years ago, the visionary scientist Geoffrey Burnstock proposed the purinergic signaling theory. Although this idea had strong opposition in the beginning, purinergic signaling is now a widespread and accepted phenomenon, with several actors including G-coupled receptors (P2Y, adenosine receptors), ligand-gated ion channels (P2X receptors), ectonucleotidases that metabolize extracellular nucleotides, and proteins that are important for ATP release to the extracellular space. Purinergic signaling is involved in health and disease, participating in processes such as synaptic transmission, cardiovascular system regulation, regulation of immune-cell function, bone growth and exocrine and endocrine secretion, among others. Likewise, several pathological states are related to purinergic signaling, including cancer, as well as cardiovascular, respiratory, immune and cognitive diseases. In this Special Issue we will focus on the potential role of purinergic signaling, including receptors. nucleosidases and transport proteins, as a potential therapeutic target for these diseases.

Prof. Dr. Amélia Pilar Rauter

Departamento de Química e Bioquímica (DQB) e Centro de Química e Bioquímica (CQB), Faculdade de Ciências, Universidade de Lisboa (FCUL), Rua Ernesto de Vasconcelos, Campo Grande,Edifício C8, 5° Piso, 1749-016 Lisboa, Portugal

Message from the Editor-in-Chief

Because of your expertise in the field of drug sciences, I kindly invite you to consider publishing your current work, in the form of a research article or a review, in the open access electronic journal *Pharmaceuticals*.

Pharmaceuticals is characterized by an active editorial board and a dynamic editorial staff. Manuscripts are peerreviewed and a final decision is provided to authors within 4–6 weeks after submission. Papers are published on the web immediately after acceptance. For details on the submission process or any other matter, please do not hesitate to contact us.

We hope to handle your contribution to *Pharmaceuticals* soon.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Pharmacology & Pharmacy*) / CiteScore - Q2 (*Pharmaceutical Science*)
