Message from the Guest Editors

The TRNT approach has been proven clinically highly promising given its experience in the treatment of neuroendocrine tumors or disseminated prostate cancer. The crucial aspect of TRNT is the evaluation of new targets, radionuclides and pharmaceuticals. The mechanisms of resistance and radiation-induced adverse effects limiting patients' survival or quality of life must also be addressed.

Areas of interest include, but are not limited to:

Evaluation of novel targets for cancer treatment and theranostics;

Design and evaluation of novel radiopharmaceuticals for treatment and theranostics;

Evaluation of non-standard/exotic radionuclides potentially suitable for TRNT;

Established and experimental TRNT strategies;

Targeted alpha therapies;

Auger-electron radionuclide therapies;

Radiommunotherapies;

Prospective combination therapies involving TRNT;

Biological effects of TRNT;

Challenges of radiobiology in TRNT;

Portugal

Message from the Editor-in-Chief

Because of your expertise in the field of drug sciences, I kindly invite you to consider publishing your current work, in the form of a research article or a review, in the open access electronic journal *Pharmaceuticals*.

Pharmaceuticals is characterized by an active editorial board and a dynamic editorial staff. Manuscripts are peer-reviewed and a final decision is provided to authors within 4–6 weeks after submission. Papers are published on the web immediately after acceptance. For details on the submission process or any other matter, please do not hesitate to contact us.

We hope to handle your contribution to *Pharmaceuticals* soon.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [PMC](#), [Embase](#), [CAPus / SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (Pharmaceutical Science)
