Message from the Guest Editor

Dear Colleagues,

The idea of targeting angiogenesis to inhibit tumor growth was proposed more than three decades ago by Judah Folkman, and since then several approaches to block or disrupt tumor angiogenesis have been explored.

Antiangiogenesis remains a dynamic and evolving field in oncology. New therapeutic targets continue to emerge followed by the rapid development of new therapeutic agents to be investigated in clinical trials.

Until now, the success of antiangiogenic compounds in the clinic is rather limited when given as monotherapies. This is in contrast with many preclinical results which revealed a much higher efficacy of these agents in animal models.

Prof. Dr. Domenico Ribatti

Message from the Editor-in-Chief

Because of your expertise in the field of drug sciences, I kindly invite you to consider publishing your current work, in the form of a research article or a review, in the open access electronic journal *Pharmaceuticals*.

*Pharmaceuticals* is characterized by an active editorial board and a dynamic editorial staff. Manuscripts are peer-reviewed and a final decision is provided to authors within 4–6 weeks after submission. Papers are published on the web immediately after acceptance. For details on the submission process or any other matter, please do not hesitate to contact us.

We hope to handle your contribution to *Pharmaceuticals* soon.

Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High visibility:** citations available in PubMed, full-text archived in PubMed Central. Covered by Embase and Scopus. To be indexed in the Emerging Sources Citation Index - ESCI (Web of Science) from Vol. 10 (2017).

**CiteScore: 4.20**, based on citations in 2017 to articles published 2014-2016.
