Cannabidiol (CBD) is one of the main natural cannabinoids found in Cannabis sativa. Due to the lack of psychotropic effects associated with Δ⁹THC and its good safety profile, CBD is the most interesting cannabinoid from a pharmacological point of view. Beneficial therapeutic effects have been reported in patients with inflammatory, neurodegenerative, and autoimmune diseases as well as in those with epilepsy and cancer.

This Special Issue aims to provide readers with the most recent advances in this field. Authors are invited to submit relevant original articles, reviews or short communications for inclusion.

Keywords: cannabis; cannabidiol; experimental medicine; pharmacology; biochemistry; natural products; inflammatory diseases; autoimmune diseases; cancer; epilepsy; neurodegenerative diseases

Message from the Editor-in-Chief

Because of your expertise in the field of drug sciences, I kindly invite you to consider publishing your current work, in the form of a research article or a review, in the open access electronic journal *Pharmaceuticals*.

*Pharmaceuticals* is characterized by an active editorial board and a dynamic editorial staff. Manuscripts are peer-reviewed and a final decision is provided to authors within 4–6 weeks after submission. Papers are published on the web immediately after acceptance. For details on the submission process or any other matter, please do not hesitate to contact us.

We hope to handle your contribution to *Pharmaceuticals* soon.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPplus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Pharmacology & Pharmacy) / CiteScore - Q2 (Pharmaceutical Science)
