# Antimicrobial Peptides and Proteins: A Potential Approach to Treat and Combat Antimicrobial Resistance

### Message from the Guest Editors

Antimicrobial peptides and proteins (AMPs), also known as Host defense peptides and proteins (HDPs), are the most promising candidates for alternative therapeutics to combat AMR since they are ancient components of the innate immune system. They are present in many organisms and are endowed with unique structural properties that allow not only the permeation and disruption of the target membranes but also the stimulation of the immune response. AMPs/HDPs have a wide range of inhibitory effects against bacteria, fungi, parasites, and viruses but have the advantages of limiting the induction and development of resistance mechanisms. Interestingly, during the last few years, research into new natural antimicrobial agents has been flanked by the rational design of new synthetic molecules inspired by natural agents and by the identification of novel bioactive sequences hidden in larger proteins, called cryptides. We therefore invite academic investigators working in these fields to submit original research articles or reviews describing and discussing the most recent advancements and developments in basic science and biomedical applications.

## About the Journal

### Message from the Editor-in-Chief

Because of your expertise in the field of drug sciences, I kindly invite you to consider publishing your current work, in the form of a research article or a review, in the open access electronic journal *Pharmaceuticals*.

*Pharmaceuticals* is characterized by an active editorial board and a dynamic editorial staff. Manuscripts are peer-reviewed and a final decision is provided to authors within 4–6 weeks after submission. Papers are published on the web immediately after acceptance. For details on the submission process or any other matter, please do not hesitate to contact us.

We hope to handle your contribution to *Pharmaceuticals* soon.

---

### Editor-in-Chief

Prof. Dr. Amélia Pilar Rauter

Departamento de Química e Bioquímica (DQB) e Centro de Química Estrutural (CQE), Institute of Molecular Sciences, Faculdade de Ciências, Universidade de Lisboa, Lisboa, Portugal

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (Pharmaceutical Science)
